

Log into ST Math with Clever

Student steps for San Diego Unified School District

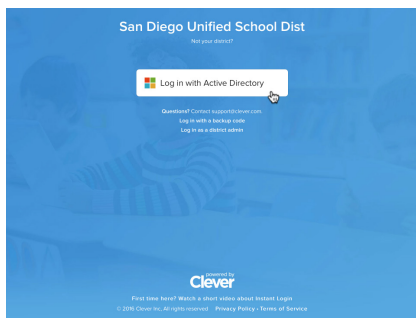

Your district is using Clever single sign-on. If you've used ST Math before, this means:

- You won't need to link students; they'll already be in your class.
- Students won't use picture passwords anymore.

Before getting started: Create a link to www.clever.com/in/sdusd that students can access on their devices. Consider naming the link "Student Applications" and posting on the school website or the browser's homepage.

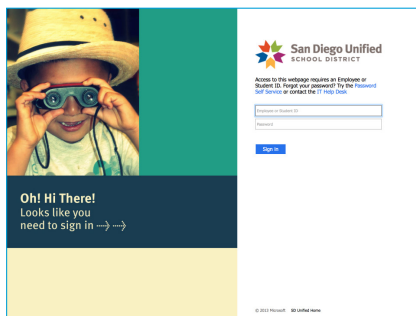

All students, whether they've played ST Math before or not, will follow these simple steps:

1

Students should open the link you created for them (www.clever.com/in/sdusd) and click **Log in with Active Directory**.

2

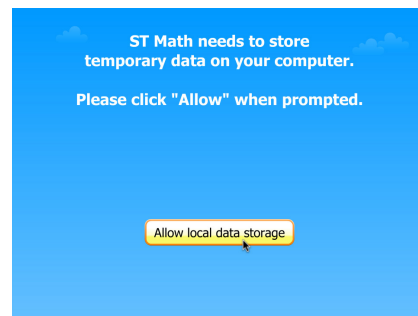

If this screen appears, students enter their 6-digit usernames and 9-character passwords.

3

Click the ST Math icon.

4

If this screen appears, click **Allow local data storage**. If prompted to update Adobe Flash, click **Allow**.

5

When the objective cone appears, students are ready to *Play the Gray!*

Note: Android tablets must be updated to ST Math version 13.1.1 or later in order for students to log in.
